

## **Contemporary Esthetics- From Diagnosis to Post Treatment Care**

Description: The program will provide insight into techniques that provide consistent esthetic results. Emphasis will be given to appropriate esthetic and functional diagnosis.

Topics to be covered will include:

- site development
- pre prosthetic tooth movement
- avoiding joint issues
- material selection
- insertion technique
- cementation options
- review of speaker's successes and failures

Emphasis will be given on why cases went sideways and how to avoid clinical failures.

Learning objectives:

- Smile diagnoses and the limitations of prosthetics to correct some esthetic challenges
- Understanding when centric matters and when it probably doesn't
- Appreciate role of proper materials and techniques to produce quality ceramic results
- Techniques to maintain your results

Presenter:

William L. Koch, DDS has been practicing in a small Vermont town since 1984. He is an AGD Master and a Pankey Scholar. He has been a Teaching Assistant and Director at the Pankey Institute. Dr. Koch currently serves as the Vice Chair of the Vermont Board of Dental Examiners. He is fond of quoting the Navy Seal Motto: "The only easy day was yesterday."
