

Updates In Dental Technology and Digital Workflows

What are the comprehensive benefits of digital dentistry and the essential steps to successfully implement and optimize a digital workflow in your dental practice? In one evening, explore the latest technology options and steps for implementing a digital dentistry workflow for consistent clinical outcomes and practice efficiency to achieve enhanced patient care.

Learning Objectives:

- Hands-on learning of a comprehensive digital workflow process
- How a digital workflow improves diagnostic precision, accurate treatment planning, and consistent patient outcomes
- How to design and implement a digital treatment plan
- How to seamlessly integrate a digital workflow with current practice records and communication.

5:00pm Registration/Reception, 6:00-8:00pm Course 2CE Credits

This course is sponsored by Zappia & Fryer General Dentistry and Benco Dental.
