

What's New? Materials and Tech that Expedite Excellence

In this fast-moving market, advertising makes every product appear to be the panacea. However, some of the best products and services don't enter the market with much fanfare. Dental professionals can become bogged down or confused when trying to decipher which new materials and technologies are right for their practices.

As editorial director with *Dental Economics* magazine, Dr. Joshua Austin authors the column *Pearls for Your Practice* and has personally worked with most new products and technologies that have entered the market. In this interactive, fast-moving course, Joshua shares the current trends in dental materials and technologies.

Learn how materials have changed over the past few years and how those changes can affect your procedures and practice. This course can be delivered focusing on either direct or indirect restorations.

Objectives:

- Explore the latest innovations and enhancements in intraoral scanning
- Learn how the improved scanning amplifies practice productivity
- Discover how these devices can close the gap of patient communication
- Illuminate growing trends and discover the best new products and innovations on the market
- Explore the impact new products/technologies have on the practice's bottom line
- Analyze how bulk fill posterior composites compare to their traditional counterparts
- Discuss time saving placement techniques for bulk fill posterior composites
- Review universal adhesives and their advantages
- Explore the three etching techniques and learn when each are appropriate
- Review current cements and identify which classes are superior
- Discuss when luting is an appropriate choice instead of bonding
- Explore many other products and items that can make your life easier and your dentistry faster
